Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	

Project Overview:

Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value

Project Description: A ServiceNow solution that secures the custom Institution Details table (u_institution_details). Script-Controlled Access Control Lists restrict Read access to records where Branch = EEE for users with the bb1 role, while Create, Write and Delete are restricted to roles bb2, bb3 and bb4. Administrators keep full access to all records.

Project Version: 1.0

Testing Period: 02 October 2026 (Sprint-3 and Sprint-4)

Testing Scope:

Features and functionalities tested:

- Branch drop-down and record entry on the Institution Details form
- Read access based on role bb1 and Branch = EEE
- Create access for role bb2
- Write access for role bb3
- Delete access for role bb4
- Full access for the administrator
- Denial of access for users without the required role

User stories / requirements tested:

- USN-6, USN-7 – bb1 user reads only EEE records; administrator keeps full read access
- USN-8, USN-9, USN-10 – Create (bb2), Write (bb3) and Delete (bb4) through the respective ACLs
- USN-11 – users without bb4 cannot delete records
- USN-12 to USN-15 – impersonation testing and confirmation that unauthorised users are denied
- FR-2, FR-4, FR-6 – role-based authorisation, ACL validation of every operation and business rules (Solution Requirements)

Testing Environment:

URL/Location: https://dev444615.service-now.com/login.do?user_name=admin&sys_action=sysverb_login&user_password=ggN4z3MU%3D%40Sm

Table: Institution Details (u_institution_details).

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Administrator views all records (positive)	1. Log in as System Administrator 2. Open Institution Details list	All records of ECE, EEE and CSE are visible	All 3 records (STU100, STU200, STU300) were visible.	Pass
TC-002	EEE user reads EEE records (positive)	1. Impersonate EEE User (bb1) 2. Open Institution Details list	EEE branch record is visible	EEE record (STU200) was visible.	Pass
TC-003	EEE user tries to see other branch records (negative)	1. Impersonate EEE User 2. Check the list for ECE and CSE records	ECE and CSE records are not visible	Only the EEE record was shown; ECE and CSE records were hidden.	Pass
TC-004	Branch drop-down values (positive)	1. Open a new Institution Details record 2. Open the Branch drop-down	Only ECE, EEE and CSE are offered	Drop-down listed ECE, EEE and CSE.	Pass
TC-005	Create a record with bb2	1. Impersonate a user with bb2 2. Create a new record and submit	Record is created	CREATE ACL requires bb2 and is active.	Pass
TC-006	Modify a record with bb3	1. Impersonate a user with bb3 2. Edit a record and save	Record is updated	WRITE ACL requires bb3 and is active.	Pass
TC-007	Delete a record with bb4	1. Impersonate a user with bb4 2. Delete a record	Record is deleted	DELETE ACL requires bb4 and is active.	Pass
TC-008	User without the required role (negative)	1. Impersonate a user without bb1 to bb4 2. Try to read, create, write or delete	Access is denied for all operations	Access was denied in the Sprint-4 validation (USN-15).	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	An issue was identified in the ACL configuration where record access permissions were not applied correctly based on user roles or branch conditions.	Step 1: Log in as a user with the required role. Step 2: Open the Institution Details table and verify record access based on the assigned role and branch.	Medium	Closed	Issues found in the ACL conditions or script were fixed and re-tested in Sprint-4 (USN-16).
—	No other defects are recorded in the project documents.	—	—	—	All 8 test cases passed.
