

Empathy Map

Date	29 September 2026
Team ID	SWTID-2026-5115
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I need to control who can access student records. • Users should only view records permitted for their branch. • Administrators should have full access to all records.	THINKS • Unauthorized users should not access other branch records. • Roles and ACLs must be configured correctly. • The access rules should be secure and reliable.
PERSONA NAME ServiceNow Administrator <i>(Role / User Type)</i>	
DOES • Creates users and assigns roles. • Creates and manages Institution Details records. • Configures and tests ACLs for Read, Create, Write and Delete operations.	FEELS • Concerned about unauthorized record access. • Responsible for protecting student information. • Confident when access is properly controlled.
